

APPLICATION DEVELOPMENT

Where do you want to go? What problem will you solve?

Bridge360 develops market-ready, turnkey software solutions on time, on budget and built to spec, as well as business-ready applications customized to your unique operation. Our application developers provide innovative yet pragmatic solutions, translating lines of code into dynamic products and solid business processes. We have experienced project managers, architects and business analysts to guide your team through each stage of development.

CLIENT SPOTLIGHT

When this renowned luxury and lifestyle retailer found their e-commerce application behind the times, we helped them make it current and cutting edge in time for their fashion launch. Bridge360 pushed technology beyond its documented capabilities for a tailor-fit solution and a successful fashion debut.

CUSTOM DEVELOPMENT

We help define your requirements, write specifications and design, develop, test and integrate software.

Regardless of your application's platform or technology requirements, Bridge360 has the expertise to deliver. We match our technical competencies and capabilities to address the complexity and demands of your project. We offer two engagement models to fit your needs:

- **Full life-cycle application development** where we accept start-to-finish responsibility for analysis, design, testing, implementation, and integration of systems.
- **Cooperative development** which aligns our experts with yours to jointly build your IT solutions.

METHODOLOGIES & COLLABORATION

We are well versed in a number of frameworks used to structure, plan, and control the process of developing an application.

This includes the pre-definition of specific deliverables and artifacts that are created and completed to develop or maintain your application.

Our team is experienced and conversant in:

METHODOLOGIES	COLLABORATION TOOLS
PMI	Confluence
CMMI	On-time
Agile	Sharepoint
IEEE	Team Foundation Server (TFS)
Rational	Jazz

TECHNICAL ENVIRONMENTS
