

CONSULTING

There is no substitute for experience when you need results.

We have problem solvers ready to find your answers. Your technology decisions are business decisions. Bridge360 helps you make informed choices, ensuring that these decisions have a positive impact on your company's bottom line.

We have a diverse portfolio of successful engagements and satisfied customers, who have trusted us to analyze the options, provide alternative recommendations, conduct risk assessments and supply the right information for confident decision-making.

CLIENT SPOTLIGHT

When you're the leading provider of legal matter management solutions, getting the details right is critical to your business. Through consulting and development services, Bridge360 provided the expert advice and experience that our client needed to take its first, important steps into new markets.

With Bridge360's guidance, they successfully launched several multi-lingual, multi-currency versions of their product offerings and have been able to maintain the localized versions of their portfolio.

Business Process Improvements

Bridge360 helps define tactical and strategic goals with needs assessments, gap analysis, feasibility studies and post-implementation reviews.

From networking schemas to modem configuration, complex retail application development to world class project management, our highly skilled team of problem solvers has the expertise to engage with you on your most important decisions.

We can provide assessments and recommendations on the impact of mergers and acquisitions on your business systems, as well as improve the scalability and performance of your IT operations and practices.

Globalization Best Practices

Because preparing a software product for international markets involves more than translation, we mentor your management teams and educate your development and test teams so you can step out into new markets the right way.

Creating software that is embraced by your customers outside the US is key to our clients' success. Bridge360 provides assessments and training on internationalization practices, standards and guidelines that remove issues and hurdles in order to plan deployments effectively and efficiently.

Technology

Evaluations

Bridge360 has been an invaluable partner in enabling our store associates

Bridge360 conducts technology and tool assessments to assist you in selecting the correct solutions for your business.

Bridge360 assists you in determining alternatives, making recommendations on which tools will meet your needs and how well your current technology measures up to newer technologies and business demands.

We work with your business stakeholders and technology teams to determine the correct evaluation criteria and success metrics. We not only assess the technologies' risks, strengths and weaknesses, but also provide implementation plans, identify constraints, and propose realistic timelines.

“**Bridge360 has been an invaluable partner in enabling our store associates**”

They help us to move quickly on several of our software enhancement projects and have been extremely supportive in our changing needs from design through implementation.

We truly value the great cooperation and follow through that we have experienced and look forward to a continued relationship.”

Kathleen Ford,
Director Retail Systems - IT
Restoration Hardware

About Bridge360

Bridge360 is a custom software and application developer. We specialize in solving complex problems at every phase of the software development lifecycle, removing roadblocks to help your software and applications reach their full potential in any market. On the path to software excellence, you can trust our expertise, diverse technical proficiencies, speed and efficiency to translate your vision to motion, no matter where you are in the process—no matter where you want to be.

The Bridge360 customer base includes system integrators, government agencies, software companies and world technology leaders, and small to enterprise businesses across the globe. Clients spanning industries from legal to healthcare, automotive to energy, and high tech to high fashion count on us to clear a path for success.
