

TESTING & QA

Taking your software from good to great.

Software that doesn't work as expected can have a huge impact on your business, causing you to lose time, money, customers, and your reputation. Whether it's the software that runs your business, or the software your market is counting on, Bridge360 understands how important it is for your software to be error-free. We deliver a full range of testing and quality assurance services.

CLIENT SPOTLIGHT

When you're a major natural foods grocer facing a cost conscious consumer, efficiency is everything. So how do you keep your technology running as neatly as your shelves are stocked? Bridge360 helped this national chain keep their inventory replenishment and merchandising software always up to date and error-free, and their operations efficient and in sync across 12 regions.

QA PLANNING

Our team of experienced quality assurance engineers will provide controlled testing environments and work with you to determine the best approach for you.

Bridge360 can help you from test strategies and planning to building automated test harnesses that accelerate your product deployments. We will give you the confidence (with metrics to prove it) to continually optimize your development goals.

TEST DEVELOPMENT, AUTOMATION & EXECUTION SERVICES

Bridge360 specializes in providing controlled, customized, and automated testing environments. We follow IEEE quality standards wherever possible.

Our testing services include Functional, Performance, Regression, Usability and Internationalization.

TEST TOOLS

Bridge360 has expertise with many of the industry tools such as Mercury, Rational and Segue. Of course, we are able to work with proprietary tools built by our clients as well.

We often put test strategies in place by building automated test solutions. Our key focus is to give our clients measurable efficiencies that meet their business goals. We work closely with your team to make sure we 'get the bugs out' while improving your product ROI. We give you the confidence your customers expect from you.

“I’ve engaged Bridge360 on projects for me over the past several years because they consistently deliver high quality results with minimal impact on my teams. They keep me informed throughout our engagements, and continuously exceed my expectations.”

Kirk Norsworthy
Sr. Director, Global Software Engineering
ACS/Xerox

About Bridge360

Bridge360 is a custom software and application developer. We specialize in solving complex problems at every phase of the software development lifecycle, removing roadblocks to help your software and applications reach their full potential in any market. On the path to software excellence, you can trust our expertise, diverse technical proficiencies, speed and efficiency to translate your vision to motion, no matter where you are in the process — no matter where you want to be.

The Bridge360 customer base includes system integrators, government agencies, software companies and world technology leaders, and small to enterprise businesses across the globe. Clients spanning industries from legal to healthcare, automotive to energy, and high tech to high fashion count on us to clear a path for success.
